Solution-driven web developer adept at contributing to highly collaborative and fast paced work environments.

SKILLS & EDUCATION

HTML, CSS, Foundation/Bulma.io/Bootstrap Frameworks, JavaScript, jQuery, C#, Node.js, MySQL, Express, REST, API, Vue.JS, React.JS

-

High School Diploma / RMHS 2011
Full Stack Certificate / UofA
(Certificate ID: 23120607)

EXPERIENCE

PREFERRED CSR AGENT & CHAT AGENT / BANK OF AMERICA
May 2017 – March 2021

Worked in multiple roles within the bank from phone agent, chat agent, and PPP loan officer. In all my roles I strove for excellency and served all clients with a white glove service. All roles were fast paced as we need to keep up with all rules and regulations which would change on daily basis. All roles required a keen sense of uncovering needs for both client benefits and use. Key accomplishments in these roles were Quarter 1 & 2 sales leader for 2018, and Quarter 1, 2, 4 sales leader 2019.

FRONT-END DEVELOPER / PRIZELOGIC
May 2021 – October 2022

My Responsibilities as a Front-End Developer was to Build custom digital & promotional websites for national brands including MillerCoors, McDonalds, Pepsi, General Mills, Lowe's, Amex, Hershey's and Amazon to name a few. I used JavaScript/jQuery, HTML5 and CSS/Sass to build websites based on mockups and prototypes. We managed site builds with Node, Gulp and NPM. Worked within Visual Studio code and ASP.NET Razor syntax. Required to test websites for multiple device's as well as cross browser compatibility. Optimized images with Photoshop and Illustrator. Worked within UX/UI design tools including XD, Sketch and Figma. Integrated websites with social networks. Built responsive, DIV based sites with the help of ZURB Foundation. Built projects using SVG animations.

RMA SOFTWARE ENGINEER I / INSIGHT GLOBAL
November 2022 – Current Role

My current role is researching, consulting, analyzing and evaluating system program needs to run our inventory software. We monitor and track Tasers and Police body cameras that are brought in from multiple states and countries and allow certain users to have access and others to be restricted on the type of content they can access. Was hired to help develop the Front-end aspect of the internal website that is used and develop new modules, sample code, SDKs, and production code while I maintain and extend existing extensions, and plugins. Heavy use of C#, RestAPI, and Front-end Technologies.

PROJECTS

CITY2CITY (API PROJECT)

Deployed link: https://jorgelopez5252.github.io/city2city/
Repo link: https://github.com/Jorgelopez5252/city2city

This project is designed to compare data between two cities. Data like relative housing costs, quality of life, commutes and more. The user would use this comparison tool to decide on where they would eventually decide to live or relocate. All data is pulled via 2 API's

TECH USED: HTML/CSS/ JavaScript/jQuery/AJAX/Bulma.io- CSS Framework/Open Weather - Weather API/Teleport - City Data API/

REACT WEATHER APP (REACT PROJECT)

Deployed link: https://react-weather-app-five-wine.vercel.app/
Repo link: https://github.com/Jorgelopez5252/react-weather-app

A beautiful, responsive, and modern React JS Weather app. To connect and display data I use React State to manage logic and axios to connect to OpenWeatherMap API. Can be viewed on both mobile and desktop

TECH USED: HTML/REACT/CSS/JavaScript/React state/NPM/Open Weather - Weather API

MULTIPLE CHOICE QUIZ (VUE.JS PROJECT)

Deployed link: https://vue-quiz-mauve.vercel.app/
Repo link: https://github.com/Jorgelopez5252/vue-quiz

A fun and Responsive Quiz with a score counter, built with VUE.JS and the VITE Engine. Quiz will alert you of correct answer via a green color over your selected choice or a wrong answer via a red color. Quiz is multiple choice but requires some knowledge of the tv show "The Office" to survive till the end. Total score will determine your outcome, are you able to get a perfect score?

TECH USED: HTML/CSS/JavaScript/VUE/VITE Engine
